PROFESSIONAL SUMMARY

Software Engineer II with 2+ years of experience (including a 6-month internship) building scalable web applications using Java, Angular, Node.js, and TypeScript. Manages end-to-end development of a core product and contributes to multiple cross-functional projects. Quick learner with the ability to adapt to new technologies and evolving requirements.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Technologies & Tools:** React, Angular, Node.js, Express, Redis, PostgreSQL, Git, GitHub, Postman, AWS CDK, AWS Lambda, REST APIs

PROFESSIONAL EXPERIENCE

Software Engineer II, Equity Data Science, Mumbai | July 2024 - Present

Excel-Style Calculation Engine Development (*TypeScript, Node.js, Angular, AWS Lambda, SQL, Unit Testing*)

- Developed a formula engine with tokenizer, parser, validator, evaluator, and autocomplete using dependency tracking to recalculate only affected cells, with 2K+ unit tests covering core and edge-case scenarios.
- Improved calculation performance by 99%, reducing processing time from 400 seconds to 2.31 seconds when processing 30,000 records across 140 columns.

Price Target Restructure (*TypeScript, Node.js, Java, Angular, AWS Lambda, Redis, SQL*)

- Restructured the database, consolidating 12 legacy tables into an optimized schema with proper relational joins. Built 4 AWS Lambda functions using AWS CDK to automate data processing.
- Reduced database records by 90% (4M to 400K) through team-based data organization, eliminating redundancy and optimizing queries, reducing UI data fetch time by 81% (16 seconds to 3 seconds in production).
- Implemented PostgreSQL COPY API, improving insert performance by 75% (2 minutes to 30 seconds for 30K records).

Software Engineer Intern, Equity Data Science, Mumbai | January 2024 - June 2024

Angular Framework Migration (v14 to v16) (*TypeScript, Angular, SCSS, NPM*)

- Migrated the entire enterprise application from Angular 14 to 16 in 2 months, ahead of the 3.5-month timeline.
- Refactored codebase to align with Angular's updated design patterns, resolving breaking changes platform-wide.
- Centralized design system establishing consistency across 50+ components and 600+ pages.

EDUCATION

- **Master of Computer Applications (MCA)**, VESIT, Mumbai, May 2024 **CGPA: 8.57/10.0**
- **Bachelor of Computer Applications (BCA)**, COCSIT, Latur, May 2022 **CGPA: 9.69/10.0**

PROJECTS

JobSentinel (*Java, Spring Boot*)

- A personalised job alert system that targets certain career pages and alerts users based on the skills matched ratio.
- Features a Jsoup crawler that scrapes Naukri job listings via JSON interception, automated notifications via email.

Portfolio (*React.js, Tailwind CSS, and Framer Motion*)

- Portfolio website featuring smooth page transitions, frame motion-based animations, and dynamic project cards.
- Focused on performance, responsive design, and modern frontend best practices.

CERTIFICATIONS

- Java Full Stack Development - **Wipro PBL (2023)**
- Java Programming - **Coding Ninjas (2023)**
- Programming in Java with 90% and Data Structure and Algorithms Using Java with 83% - **NPTEL**
- Java (Basic), SQL (Basic) - **HackerRank**

ACHIEVEMENTS

- **1st Place** - Java & C++ Programming Contests, COCSIT Latur (2022) (District Level)
- **2nd Place** - Web Technology Contest, COCSIT Latur (2021) (District Level)
